

Selected Student Comments from Course Evaluation (GOVT 404 – Spring 2024)

Professor Park always provided the opportunity for students to participate in class discussions. Park listened to everyone's opinions and typically expanded on them. Park's feedback for each assignment as part of the final research paper was always very detailed and helpful for the next step of the assignment. And Park always tried to diversify the lessons so that it is not all lecture, utilizing guest speakers, videos, and having a presentation assignment which allowed us students to lead the class on one of the readings.

I can't compliment Professor Park enough about choosing engaging readings and making us engage with the material that can sometimes seem abstract and inaccessible to college students like security issues. She made us think!

Professor Park's classes are always well organized. She really knows how to run seminars.

I thoroughly enjoyed taking this class. I'm not particularly a talker in class, but I do pay attention and synthesize what gets brought up in class. The class discussion is always very interesting and brings new perspective to me. Even though I hardly raise my hand, Professor Park always steers the conversation in an interesting direction.

One of the most in depth and interesting classes I've taken so far. Interesting topics each class meeting and guides the lectures extremely efficiently. Fair grader, fair work given. Always attentive and ready to speak with students. All in all, an excellent job.
